

# AGILIS BLENDER

## A 2540 AGILIS BLENDER

### Blender

- Application:** The function of A 2540 AGILIS BLENDER is to optimize the alignment of special-effect particles in blending areas. When AGILIS X-TREME is applied in the blending area, the effect particles of the overspray can align to only a limited extent. If A 2540 AGILIS BLENDER is applied to the blending area beforehand, it absorbs the basecoat overspray and the effect particles contained in the overspray can align as in a coherent basecoat applied wet. This prevents possible shadows resulting from improperly aligned effect particles, including sanding scratches.
- Key Features:** A 2540 AGILIS BLENDER is ready for use and does not have to be adjusted with a separate thinner.
- Remarks:** This product can also be used as a wet bed application process technique which is explained in detail further in the document.

#### Paint System

Please see INFO R-M module "R-M AGILIS X-TREME".

#### Handling

##### Air cap WS-400-03 BF Nozzle BF40

Compliant WS400 Series 2 with 1.5 bar inlet pressure: - A 2540 AGILIS BLENDER  
This nozzle and pressure and process should only be used with the AGILIS X-TREME product portfolio.  
This is not approved for standard conditions and standard basecoat products.

1 full coat + 1 "Finish coat" applied wet-on-wet
