

PK 300W

PK 300W

Preparation wipes

Application:	R-M preparation wipes are intended for use on cleaned bare metal surfaces such as steel, galvanized steel and aluminum.
Key Features:	Thanks to their chemical reaction in contact with metal surfaces, R-M preparation wipes increase the corrosion resistance and adhesion of the paint system to be applied.
Remarks:	Recoatable with all R-M undercoat materials, except polyester body filler and waterborne products.

Storage temperature	5-45 °C
Shelf life	24 months

Cleaning

PK 1000, PK 2000
Observe process-related regulations. Use on bare metal surfaces only.

Handling

Close the container immediately after removing a preparation wipe to protect the other wipes from drying out. If you want to reuse the wipes during the same working day, store them in a container or in a resealable plastic bag. This will protect the wipes from drying out. Do not return used wipes to the original packaging.

Evenly wet the entire bare metal surface with PK 300W.
(Wipe in overlapping single cross coats).
The surface must stay moist for at least 1 minute. This is imperative for the chemical reaction to complete and form a passivation layer.

Flash off at 20°C: Matt Surface (max. 8h)

Safety advice:

2004/42/IIIB(c)(780)8: The EU limit value for this product (product category: IIB.c) in ready-for-use form is max 780 grams of VOC per liter. The VOC content of this product is 8 g/l.

It cannot be ruled out that this product contains particles < 0.1 µm.

The products are suitable for professional use only.

For the use of this product please adhere to the actual safety recommendations and the personal protective equipment.
